

Enabling you to connect.

Complete voice, data and
Wi-Fi wireless solutions.

Inside:

- Hosted Voice and Phone Solutions
- Premise-Based Voice Solutions
- Wi-Fi Networking
- Digital Business Line

Your business or organization has communication demands, from phone service to high-speed Internet and all the nuances in between. Powernet offers comprehensive solutions that are flexible, functional and affordable to help you meet those demands.

Hosted IP PBX

A foundation for communication

You're a growing organization – at least that's what you strive to be. That means you need a communications solution that can scale to meet future growth, but you need it on your present budget. Hosted IP PBX from Powernet delivers on both fronts. The major benefit of a hosted solution is you don't have to worry about the back-end support and upkeep of your phone system – we'll take care of that for you, meaning a minimal upfront investment on your part.

Hosted IP PBX also offers unlimited local calling with metered and unlimited long distance plans to extend cost-savings beyond the initial price. With the flexibility to choose the number of lines you need and the inclusion of standard business calling features, you're not sacrificing functionality just to stay under budget.

Hosted IP PBX Plus

Voice, video and instant messaging from a desktop client

Take your hosted solution to the next level with this service. Hosted IP PBX Plus gives users full access to their professional network via voice, video and instant messaging from a desktop or mobile client. What does that mean for businesses?

It means employees who were once chained to their desk with a traditional fixed-line phone now have the flexibility and mobility to communicate with anyone, any time, any place. Hosted IP PBX Plus desktop is available for Mac and PC, with a mobile version available for iPhone and Android smart phones.

allworx **Premise-Based IP PBX with Allworx** An on-site solution for any size business

We offer one of the most comprehensive premise-based IP PBX solutions on the market, thanks to our partnership with Allworx. With a robust lineup of phone and software packages, this solution can support single- and multi-site organizations and is easily scalable to accommodate growth. Remote users can still connect with their office or facility via Internet or utilizing the Reach mobile client.

The phone system itself is highly customizable, easy to use and rich in features with high-fidelity voice quality. Allworx software allows you to streamline the back-end of your system, giving you flexibility with call distribution, conference bridge, multi-site unification and more. On-site training is also included for you and your staff.

Ruckus Wi-Fi Connect your network

Wireless networking, specifically Wi-Fi, is essential in giving workforces the ability to operate at maximum efficiency. Powernet's partnership with Ruckus allows us to offer Smart Wi-Fi that provides up to 4x more coverage than standard Wi-Fi technology. The Ruckus Zoneflex WLAN combines reliability, performance and security with centralized management capabilities and support for IP-based video and voice streaming, making it an essential component in your communications system.

Digital Business Line Let your voice be heard

Unlimited local calling, choice of bundled or metered long distance and free online feature management – these are just a few of the benefits of Powernet's Digital Business Line. Perfect for any size business and offering 24/7 U.S.-based NOC support, Digital Business Line enables quality connectivity with Powernet reliability, all while reducing costs by integrating with your existing equipment.

WHY CHOOSE HOSTED?

1. Reduce costs

No upfront investment

2. Improve efficiency

Reliable system optimized for quick communication

3. Free up resources

We take care of the back-end support and operations so you don't have to

4. Allow for scalability

Add or subtract phones and functionality as needed

5. Stay cutting-edge

Get access to leading unified communications technology

Secure Your Business

Ask us about direct connections with PowerConnect

PowerConnect enables communication over a dedicated direct connection, as opposed to standard public connections. Able to integrate with your existing IP technology and infrastructure, PowerConnect also offers line flexibility and multi-site service. Read more at: powernetco.com/product/powerconnect
