

Enabling you to connect.™

Hosted IP PBX Plus: The Accession Communicator for Desktop and Mobile

Inside:

- Improving Mobile Communication
- Device Integration
- Features and Benefits
- Improving Productivity and Time Management

Accession Communicator
Mobile App

One Number, Many Devices

Keep private and business numbers separate

Single number convenience means that your callers need only one number, letting you choose where and when to be reached, and even set forwarding rules for VIPs. The choices you make on one device can apply to all your connected devices, giving you more control over how you work.

Enable Smart Mobility

Take your office anywhere you go

Call from anywhere. Make and receive calls on your mobile as though you were at your desk. With single number convenience, the person you call will see your Powernet desk phone number. Now you can choose who sees your mobile number.

Stay Connected Anywhere

Your working life moves constantly from desk to laptop to mobile smart phone to tablet. Now you can use all the features of your Powernet phone services from almost any device, whether at your desk, at home or on the move.

Accession Communicator lets you seamlessly move calls from device to device, or from cellular to Wi-Fi, even in the middle of a call. Now you can work from anywhere with all the features you value so much when you're in the office, and all connected to your office phone number.

Voicemail and Contact Lists

Receive calls on any device. When someone calls your primary number, the call will appear on one or more of the devices that you've set up. This can include your desk phone, your mobile phone, your PC or Mac, and tablet devices.

Seamlessly transfer calls. Start a call on Wi-Fi and switch it to cellular if you move out of Wi-Fi coverage. Move a call to your fixed line when you arrive at the office. Take a call with you by switching it from your desk phone to your mobile, or even to your tablet.

Call manager. The call manager helps you with features and makes it easy to mute calls, transfer calls, make three-way calls, place calls on hold, record calls (where local laws permit) and adjust the microphone or headset volume.

Upgrade your calls to video. If the person you're calling is on your system or has a compatible service, you can choose to uplift the call to a video call.

Powerful Features

Office phone features on any device

Integrate your contacts. See and access all your contacts – including the corporate directory– in any device. Search, call and edit any of your contacts in a consolidated list from several sources.

Visual voicemail. Easily check your voice, video and fax messages from one message center. Your voice messages can even be translated into text so you can read them without dialing in to retrieve them.

Conference calls. It's simple to set up and manage audio conferences from your desktop.

Chat. Send instant messages to other people in your corporate directory who are using the same service, no matter what device they are using.

Softphone for your PC. Add a headset to your desktop or laptop then make and receive audio and video calls from your PC just like you would on your desk phone.

Desktop App Main View

Device Compatibility

It's easy to download and install the app on your smartphone, tablet, PC or Mac. Accession Communicator for Mobile works on these mobile devices:

- Android phones and tablets with ARM chips running 2.3.3 (Gingerbread) or later version.
- iPhone 3GS, 4, 4S running iOS5 or later.
- iPad running iOS5 or later.

***Accession Communicator is built on Metaswitch, a leading global provider of telecommunications technology.**

Desktop App
Active Call and Call Manager

A Key Part of Your Business Strategy Integration and security

Accession Communicator is integrated with your hosted suite of business services, including our advanced IP voice services network with reliable performance and great support. You can use the same valuable services that you see from your office extension, such as 4-digit dialing, auto attendant and automated call distribution, and your sensitive information is safeguarded with our industry standard security and privacy measures.

About Powernet

Powernet enables businesses to connect with audiences in the office and across the world through wireless networking, voice, data and call center solutions, in addition to domestic and international carrier services. With more than 20 years of telecom experience and expert sales and support teams operating out of our Cincinnati, Ohio headquarters, we provide our partners and clients the unparalleled service and innovative technology they need to achieve their business goals.
