TARIFF FORMAT

- A. Page Numbering:** Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, occasionally, when a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers:** Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current Page number on file with the Commission is not always the Page in effect. Consult the Check Page for the Page currently in effect.
- C. Paragraph Numbering Sequence:** There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Pages:** When a tariff filing is made with the Commission, an updated Check Page accompanies the tariff filing. The Check Page lists the Pages contained in the tariff with a cross-reference to the current revision number. When new Pages are added, the Check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The tariff user should refer to the latest Check Page to find if a particular Page is the most current on file with the Commission.
