### ADVISORY FORMAT

- A. Page Numbering:** Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, occasionally, when a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers:** Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Advisory approval process, the most current Page number on file with the Commission is not always the Page in effect. Consult the Check Page for the Page currently in effect.
- C. Paragraph Numbering Sequence:** There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I.(i).
  - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Pages:** When an Advisory filing is made with the Commission, an updated Check Page accompanies the Advisory filing. The Check Page lists the Pages contained in the Advisory with a cross-reference to the current revision number. When new Pages are added, the Check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The Advisory user should refer to the latest Check Page to find if a particular Page is the most current on file with the Commission.

Callers from such number hear an announcement that the calling party is not accepting calls.

- C. **Call Forwarding - Fixed, Busy Line No Answer** – This feature, when activated, redirects attempted terminating calls to another Company-specified line. Call originating ability is not affected by Call Forwarding-Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding – Fixed, Busy Line No Answer is billed for the forwarded leg of the call.
- D. **Call Forwarding -Variable** – a Customer activated feature that automatically transfers all incoming calls from the Customer’s telephone number to another dialable telephone number until the Customer deactivates the feature. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding – Variable is billed for the forwarded leg of the call.
- E. **Call Waiting with Caller ID with Name** – Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller’s name and number previewed on a display screen allowing a Customer to prioritize and/or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Call Waiting with Caller ID with Name Service requires the use of specialized Customer provided equipment not provided by Company. It is the Customer’s responsibility to obtain such Customer provided equipment.
- F. **Caller ID Per Line Blocking** – allows a Customer to prevent the transmission and display of their directory number and/or directory name information on outgoing calls. Line Blocking is in operation on a continuous basis and is applicable on all outgoing calls from Customer’s blocked line. Line Blocking does not prevent transmission of the calling party information to emergency Services that utilize automatic number identification for delivery of the calling information.

- G. **Caller ID with Name** – allows a Customer to see a caller’s name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and/or screen incoming calls. Caller ID records that name, number, date and time of each incoming call – including calls that are not answered by the Customer. Caller ID Service requires the use of specialized Customer provided equipment not provided by PNG. It is the Customer’s responsibility to obtain such Customer provided equipment.
  
- H. **Speed Calling** – allows a Customer to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.
  
- I. **Three-Way Calling** – Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may Disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used with both outgoing and incoming calls.

**J. Per Use Custom Calling Features**

- 1. Last Return Call (\*69)** – This service allows a customer to return the most recent incoming call and hear an announcement of the last telephone number that called. To activate Return Call (\*69), the customer dials a code, then hears an announcement of the telephone number of the last party that called. If the customer wishes to return the call right away, voice prompts will instruct the customer to dial a certain digit and the call will automatically be returned.
- 2. Caller ID Blocking (\*67)** – blocks the Customer’s name and number from being transmitted on all outgoing calls from a particular line. Per call blocking is achieved by pressing \*67 prior to each call, while per line blocking blocks the name and number of every outgoing call. Dialing a special code prior to dialing the number of the person being called can unblock the number and name. Caller ID Blocking is provided at no charge.
- 3. Repeat Dialing (\*66)** – automatically redials the last telephone number the Customer dialed. If the number is busy, this Service will keep dialing the busy number up to 30 minutes and alert the Customer with a special ring when the line is free. The call will automatically be made when the Customer picks up the receiver. Repeat Dialing does not tie up the Customer’s line, allowing the Customer to make and receive calls while it attempts to redial in the background

C. Determination of Airline Miles - Measured Rate Service Distance Calculation

To determine the rate distance between any two rate centers proceed as follows:

1. Obtain the "V" and "H" coordinates for each rate center-- V&H Coordinates can be obtained either from the Company or Telcordia or other national telecommunication products.
2. Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates\*.
3. Divide each of the differences obtained in (b) by three, rounding each quotient to the nearer integer.
4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in (3) by three and repeat step (4). Repeat this process until the sum of the squares obtained in (4) is less than 1778.

\*Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

C. Determination of Airline Miles - Measured Rate Service Distance Calculation, Continued

5. The number of successive divisions by three in steps (3) and (4) determines the value of "N". Multiply the final sum of the two squares obtained in step (4) by the multiplier specified in the following table for this value of "N" preceding;

N	Multiplier	Minimum Rate Mileage
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361

6. Obtain square root of product in (5) and, with any resulting fraction, round up to the next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate shown in (5) preceding, the minimum rate mileage corresponding to the "N" value is applicable.
