SYMBOLS

The following symbols shall be used in this Tariff for the purpose indicated below:

- C To signify **changed** regulation or rate structure.
- D To signify a **decreased** rate.
- I To signify an **increased** rate.

TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Tariff approval process, the most current page number on file with the Commission is not always the page in effect. Consult the Check Page for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Pages** - When a Tariff filing is made with the Commission, an updated Check Page accompanies the Tariff filing. The Check Page lists the pages contained in the Tariff, with a cross-reference to the current revision number. When new pages are added, the Check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The Tariff user should refer to the latest Check Page to find out if a particular page is the most current on file with the Commission.

2.3.8. Jurisdictional Reports

- A. For Switched Access Services, where jurisdiction can be determined from the call detail, the Company will use the percentage of interstate originating and terminating Feature Group D traffic to determine the percent of interstate usage (“PIU”) to apply to all other Switched Access Services provided by the Company to the Customer.
- B. For Switched Access Services for which the Company cannot determine the jurisdictional nature of Customer traffic and its related access minutes, the Company reserves the right to require the Customer to provide a projected estimate of its traffic, split between the interstate and intrastate jurisdictions. The Customer shall upon ordering Service, and quarterly thereafter, report the percentage of interstate use and such report will be used for billing purposes until the Customer reports a different projected interstate percentage for a working Trunk group. When the Customer adds Trunks to or removes Trunks from an existing group, the Customer shall furnish a revised projected interstate percentage for each Service arranged for interstate use. The revised report will serve as the basis for future billing and will be effective on the next bill date. No prorating or back billing will be done based on the report.
- C. The Company may request detailed information in support of the reported percentage annually and retains the right to retroactively adjust the Customer's most recent bills covering the preceding eleven months if a substantial discrepancy is found to exist. If an audit of the reported percentages reveals a substantial deviation from the Customer's previously reported PIU for the period upon which the audit was based, the call detail records may be requested more than once annually.

SECTION 2 – RULES AND REGULATIONS, Continued

2.3. OBLIGATIONS OF THE CUSTOMER, Continued

2.3.9. Jurisdictional Audits

- A. The Customer must maintain these records for 24 months from the date the report became effective for billing purposes.
- B. Initiation of an audit will be at the sole discretion of the Company. The audit shall be performed by an independent party selected by the Company. An audit may be initiated by the Company for a single Customer no more than once per year. The Customer shall supply the required data within 30 calendar days of the Company's request.
- C. In the event that an audit reveals that any Customer reported PIU was incorrect, the Company shall apply the audit result to all usage affected by the audit. The Customer shall be backbilled or credited, for a period retroactive to the date that the incorrect percentage was reported, but not to exceed 24 months. Backbilled amounts are subject to a late payment penalty and payment shall be made in immediately available funds, within 31 days from receipt of bill or by the following bill date, whichever is a shorter period.
- D. Should an audit reveal that the misreported percentage(s) of use has resulted in an underpayment of Access charges to the Company of five percent or more of the total Switched Access Services bill, the Customer shall reimburse the Company for the cost of the audit. Proof of cost shall be the bills, in reasonable detail submitted to the Company by the auditor.
- E. Within 15 days of completion of the auditor's report, the Company will furnish a copy of the audit results to the person designated by the Customer to receive such results.

- B. If the Customer's estimate of the interstate traffic on the Service is more than 10% of the total traffic on that Service, the Service will be provided according to the applicable rules and regulations of the appropriate interstate Tariff.
- C. If the percentage of interstate traffic on the Service changes to the extent that it alters the jurisdiction of the Service, the Customer must notify the Company of any required change in status. The affected Service will revert to the appropriate jurisdictional Tariff within the next full billing cycle. Any applicable termination liability will be transferred with the jurisdictional change of the Service.

SECTION 2 – RULES AND REGULATIONS, Continued

2.3. OBLIGATIONS OF THE CUSTOMER, Continued

2.3.11. Mixed Interstate and Intrastate Switched Access Service

When mixed interstate and intrastate Switched Access Service is provided, all charges, including Non-Recurring Charges, usage charges, and optional features, will be prorated between interstate and intrastate. The percentage provided in the reports as set forth in Section 2.3.8 preceding will serve as the basis for prorating the charges. The percentage of an Access Service to be charged as intrastate is applied in the following manner:

- A. For nonrecurring chargeable rate elements, multiply the percent intrastate use (1-PIU) times the quantity of chargeable elements times the intrastate Tariff rate per element.
- B. For usage sensitive chargeable rate elements, multiply the percent intrastate use (1-PIU) times actual use (measured or Company assumed average use) times the intrastate rate. A similar calculation is then performed to determine the interstate portion of the bill.

During such period of temporary discontinuance, credit allowance for Service interruptions as set forth in Section 2.6 following is not applicable.
